DESCRIPTION

The ARTEC-312.96 is a compact 2-way full-range loudspeaker system comprised of one 12" low frequency transducer and one M-34 compression driver with titanium diaphragm. The rotatable waveguide provides 90° x 60° coverage and allows the systems to be installed in either the vertical or horizontal position maintaining the needed dispersion characteristics.

The Artec-300 cabinets are constructed from Baltic Birch plywood and finished with a durable ISO-flex paint. The trapezoidal enclosure design helps eliminate standing wave coloration.

The cabinet is fitted with M10 threaded suspension points.
