

1000 W, 2U rack amplifier and processing solution

Description

The Kommander-KA14 is a versatile amplifier, easily adaptable for small applications that do not require a lot of power, featuring four configurable output channels capable of delivering 250 W at 4 Ω .

The Kommander-KA14 is a complete system with a basic mixer, processor and amplifier. The integrated DSP offers parametric eq, signal routing matrix, I/O leveladjustment, delays and limiters to avoid the need for additional external processors.

The front panel has an easy-to-use touchscreen that gives access to all the basic functions for quick setup.

The onboard preset library offers easy and optimal configuration for endless combinations of K-array Lyzard, Vyper, Tornado and Rumble loudspeakers.

All DSP functions are remote controlled via the K-framework software over USB connector.

The amplifier is built into a 2U lightweight, sturdy chassis and comes with a kit of removable rack adapters and four rubber pads for flat surfaces.
